

Gantry Loader *for Press-Side® 3000*

*Automatic, ergonomic loading
of fixtures into the Press-Side®
3000 Rapid Cycle Metalizer*

Quicker Loading With Less Operator Fatigue

Add a Gantry Loader to your Press-Side 3000 Rapid Cycle Metalizer to increase throughput while decreasing operator fatigue. Rather than manually lifting and loading the fixtures, operators activate the action of the Gantry Loader by placing their hands over palm sensors. This causes the Gantry to automatically slide into the metalizing chamber, attach to a fixture, and retract it. The operators then manually rotate the arm and use the

palm sensors to signal the Gantry to slide a new fixture into the chamber while they unload and reload the fixture with the next parts to be coated.

Advantages of the Gantry Loader

Features

- Handles multiple fixtures
- Automated ergonomic loading
- Uses sturdy metal fixtures
- Metal fixtures create less water vapor in the chamber compared to plastic fixtures

Benefits

- Improves performance efficiency and decreases cycle time
- Reduces operator fatigue and improves efficiency
- Last longer than plastic fixtures, thus reducing replacement part costs, maintenance costs and downtime
- Increases throughput by reducing cycle time
